## A Designers Combination of Three Plyed Colors

The Lizbeth Twirlz's 100% Egyptian cotton thread is a 6-ply Cordonnet, which means two threads are twisted together, then three cords are twisted together for a 6-ply Cordonnet. BEFORE the three cords are twisted together they are dyed three different colors, then twisted together, double mercerized, and gas singed. This gives the Lizbeth Twirlz's thread a unique look never seen in a 6-ply Cordonnet thread. Made in China.

# **LizMetallic™**

Unique Metallic Thread for All Needle Arts!  
A strong, smooth, kink resistant Metallic

Comparable to Size 20 - HM20 - \$5.95 ea (155 yds /25 gr)

Some shades of this thread are not colorfast due to the dye process used. Also, metallic threads WILL unwind from the ball very easily. *Recommend using with the Lizbeth Thread holder, listed on page 2.* Metallic isn't a natural fiber like cotton, and it can have a small variance in size from color to color. From dye lot to dye lot there can be a color difference. Made in China.

\*We can no longer make thread color #316.

**Care:** Liz Metallic is hand washable cool water or machine washable cool water, gentle cycle. Do not use bleach. It can also be tumble-dried on low setting. If ironing a finished piece do not iron directly on the thread; use a cloth, and do not use steam. The metallic is dyed so it could bleed during the first washing.

# First Steps in Needle Tatting

## Getting Started

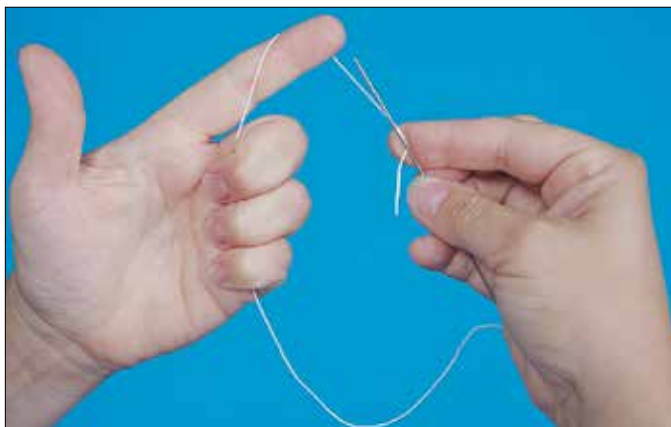

1. To begin, CUT a length of thread off a ball that is 40" long. Thread the needle so one thread end is 4 inches long, the other 36 inches. Holding the needle in your right hand, pick up the LONGER (36 inch) thread in your left hand.

2. Put the thread behind the needle. Hold it against the needle using your right index finger. On your left hand close the three bottom fingers over the longer thread, as shown below.

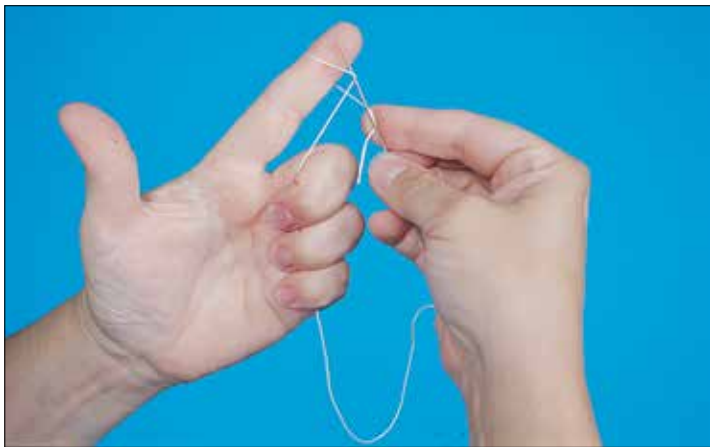

3. Wrap the thread on top or over your finger (clockwise around) as shown below. NOTE: the direction of the thread around your finger depends on whether you are working the first or second half of the double stitch. Begin with the first half of the double stitch, as shown here.

## Making A Double Stitch

*This two-part stitch is the only stitch in tatting.*

1. From the bottom side of the index finger going upward, slide the needle toward the end of the finger. Put the thread on the needle, then remove your index finger.

2. Hold the stitch on the needle using the right index finger. The first half of the double stitch is complete.

3. Holding the thread in the position described in Getting Started, wrap the thread under or behind your index finger to the front (counter clockwise).

© 1999 Handy Hands, Inc. All rights reserved.

4. Bend your index finger. Slide the needle toward the end of the fingernail, put the thread in the needle and remove your index finger.

5. Slide the thread along the needle toward the other stitch and snug them together. The double stitch is now complete.

### Making A Picot

*A picot is a loop between double stitches.*

*Count the double stitches on each side of a picot when you are working a pattern.*

1. Work the first half of the double stitch on the needle. Stop the thread about 1/2-inch from the previous double stitch, using your right index finger to hold it in place. Then work the second half of the double stitch, sliding it along the needle to the first half, as shown below. The space between the double stitch creates a picot.

2. Slide the double stitch over to all the other stitches. In the example below, there are five double stitches, one picot and one double stitch on the needle.

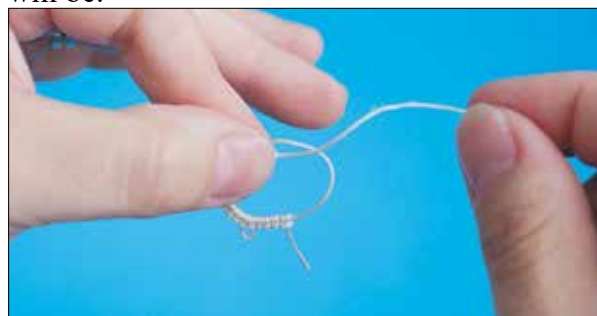

### Making A Ring

*Cl is the symbol for "close". It means to make your double stitches and picots into a ring.*

1. To make a ring(R):  
With your right hand, hold the needle. Put the thumb and index finger of your left hand on the stitches. Slide the stitches toward the eye of the needle. Next, slide the stitches off the eye of the needle. *Do not let go of the double stitches.*

2. Continue sliding the double stitches down the thread. The stitches will form a ring between your fingers, as shown below. Pull only the needle thread, not the short tail. The tighter the thread is pulled, the smaller the ring will be.

If a ring does not form and stitches look like a half moon, you did not begin correctly. Start over using another 40-inch length of thread. Refer to *Getting Started*, as the problem is starting. Be sure and start using the LONGEST end of the thread.

3. The ring is closed. The pattern for the ring shown will read R: 5 - 5 - 5 - 5 Cl. (or R 5ds, p, 5ds, p, 5ds, p, 5ds, Cl.)

## INSTRUCTIONS

If needle tatting is new to you, follow the step-by-step instructions on the previous pages to learn the basics to complete this project.

**For flowers**, cut thread 40 inches long for each blossom.

\*R 1 - 1 - 1 - 1 - 1 - 1 Cl. Leave ¼-inch space.

R 1 - 1 - 1 - 1 - 1 - 1 Cl. Leave ¼-inch space.

Repeat from\* to \* making as many rings of that color as you wish. Repeat the pattern in different colors for a total of 16 flowers. If desired, vary the number and size of picots (petals) in flowers, for a more natural look.

**For small butterfly**, cut thread 40 inches long. Begin by leaving a ½ -inch tail.

R1,Lp,1,sp,1,p,1,p,1,sp,1,Lp,1 Cl.

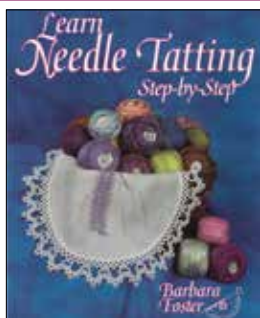

**To finish**, trace the full-size drawing for the basket (on the back page) onto paper or card using a pencil. You may wish to use a sheet of graphite or lightweight/tracing paper, to make tracing easier. Use colored pencils to color and shade the drawing.

Cut tatting into single flowers. Dip a toothpick into glue: place a dot of glue onto each flower. Glue flowers atop small o's in pattern.
